

TEARDROP 1.0

Manufactured locally in the UK, the Teardrop lights are made from solid machined metals. The glass bulbs are hand blown by artisans, creating individual and unique shapes each time.

The lights are available in two ranges: a single pendant with ceiling rose or as a bespoke designed arrangement with a custom base.

Designed to be arranged in a cluster of varying heights or as a stand alone pendant, the Teardrop is a beautiful addition to any interior space.
